To develop the Institution of Engineers, Bangladesh into a globally competitive and highly respected Center of Excellence of engineering knowledge creation and leadership. My vision is to make IEB a dynamic organization which connects engineers, academics, industries, government, and emerging technologies to engineer solutions for the country's sustainable development.
By promoting research activities, I will make IEB a hub for innovativeness, research culture, entrepreneurship, and knowledge-sharing. I will also create more opportunities for publishing research works in reputable journals and hosting seminars, conferences, workshops, and technical talks. There is also a need to promote and practice cutting-edge, sustainable, digital, and environmentally friendly engineering methods and designs in the country.
I will also ensure the IEB works to improve the professionalism, ethics, career development, and welfare of engineers while supporting them in their functions to elevate their voices and protect their rights as professionals. I have the vision of making IEB a platform for young and middle-level engineers to network, gain knowledge, and develop their skills further.
The Institution needs to play a more significant role in influencing and advising the government on matters affecting the engineering profession, especially the development and growth of infrastructure, technologies, industries, energy, environment, and digitalization.
With these visionary perspectives, IEB will be a dynamic and innovative institution that empowers engineers and supports sustainable development and a prosperous Bangladesh.
