

Dear Engineers,

Having passed through unprecedented challenges and suspended activities in all different sectors of development and education due to pandemic, the world is moving on at a faster pace recovering for the lost lives, lost times and lost productivity. Bangladesh being no exception, in its journey of being recognized as one of the fastest growing countries in the world, has been experiencing momentous infrastructural development to keep up with the pace of such booming economy and rapid industrialization. The contribution of civil engineers is of immense importance from the context of Bangladesh in ensuring sustainable infrastructure development, managing natural resources, and building resilience against natural and artificial disasters, holistically in different capacities. Essentially, with the growing need to continue with the initiative of showcasing the challenges and opportunities in the field of civil engineering in Bangladesh, **5th Annual Paper Meet & 2nd Civil Engineering Congress is to be organized by the Civil Engineering Division (CED) of Institution of Engineers, Bangladesh (IEB)**. It is an immense pleasure to share that the conference is going to be held on **29-30 July 2022** with the theme of **"Role of Civil Engineers to Graduate towards a Developed and Prosperous Nation: Bangladesh Perspective"**. This conference of the CED, IEB intends to leverage a connection between academia and industry, which seems to be one of the utmost necessities to accelerate sustainable development in Bangladesh. This conference will include research articles and case studies depicting pictures overcoming previously faced challenges and thus will leave examples for both the academia and industry to ponder over and get prepared for upcoming challenges. The presentations and published articles will enlighten professional engineers, planners and policy makers of government and non-government organizations and make them motivated to collaborate more with academicians, researchers, and experts from other relevant fields. This integration is a powerful tool for taking a step forward towards achieving the goals of the fourth industrial revolution.

We wholeheartedly seek support from your end to encourage your esteemed employees/faculty members to participate in this conference and share their experience. We extend our request to kindly share the website link (<http://occapm.iebd.net/>) in your organization and endorse their submission of abstract, to be completed by April 14, 2022 for consideration.

Thank you for your attention. We look forward to obtaining active participation from your esteemed institution in the conference. Should you have any queries or suggestions, please feel free to communicate with us by contacting at this email address: info@occapm.iebd.net.

Sincerely,
Civil Engineering Division
Institution of Engineers, Bangladesh (IEB)

Prof. Dr. Engr. Munaz Ahmed Noor, F8959
Chairman
Civil Engineering Division, IEB

Engr. Amit Kumar Chakrabarty, PEng, M25944
Secretary
Civil Engineering Division, IEB
